

A brief History of the Universe (TA-7901)

(From BNE 0451 to NE 815)

Year BNE 0451

Arkeera is nested in the middle of the known universe. Current astronomical knowledge based around Arkeera and its binary star system. 1/4 of Arkeera's moons are known (Lunis). 2/12 of the Eroth System's planets known (Arkeera and Tier).

The Red Army begins its takeover of Central and Northern Arkai. White army begins to take power in the south.

Ombria continues to be run by smaller empires and civilizations.

Year BNE 0419

Goldenhelm takes power in Ombria, siding with the Elves of Emetheas. The Dwarves of Kazador delve deeper into the earth, siding with the gnomes of Mire.

Year BNE 0382

Second of Arkeera's moons discovered (Nerv).

The Red Army takes hold of the top 2/3 of Arkai. The White army alliance with the dragons begins.

The dragons begin the hostile takeover of Ombria. The halflings of Summerwall attempt revolts and city is ravaged.

Year BNE 0177

The Beginning of the First Great War. The Red army attempts to move south into the White army's homestead.

Year BNE 0174

The End of the First Great War.

The dragons ravage much of the Red Army, but the majority of dragons are wiped out on Arkai. Few remain.

Both sides consider the war over as too many were lost and neither side could continue the fight. Tensions rise.

Year BNE 0173-0122

Astronomical discovery thrives for the first time in Arkeera.

Separate groups in both Arkai and Ombria discover the two remaining moons of Arkeera (Vithos and Syrra) as well as 4 more of the 12 planets in the Eroth System (Genesis, Kor-karai, Undare, and Coronis - 6 still unknown).

Year BNE 0121

A massive necromantic plague dubbed 'The Dark Plague' hits Ombria.

The high priests of Emetheas and the Clerics of Kazador attempt to find cures to no avail.

Year BNE 0120-0052

Long Distance Telecommunication Developed. First communications between Arkai and Ombria established.

Automobile Invented in Southern Ombria. Trade begins between Ombria and Arkai.

The Dark Plague spreads throughout Ombria, wiping out the dragon tyrants and much of the Halfling population.

Year BNE 0051

The Dark Plague completely wipes out the halflings of Summerwall only a few centuries after the town is destroyed in the draconic takeover.

Halflings considered extinct in Ombria.

Trade halted between continents due to the Dark Plague and fear of the epidemic spreading to Arkai.

The dragons of Arkeera abandon their hold on Ombria and go into hiding.

Year BNE 0050-0006

First small-scale aircraft invented. Technological advancements are being created at quickening rates.

First computers invented. Shortly after, a worldwide network of computers is established.

Populations of humanoids significantly diminishing in Ombria. This process is slow due to the spread out nature of the continent.

The Ombrian Empire established between the in attempt to find a cure and unite Ombria before it is destroyed.

First Space flight completed. The remaining 6 of the 12 planets in the Eroth system discovered (twin planets Zelios and Kaihl, Ratio, Maiar, and dwarf planets Cyprus, and Hera).

Year BNE 0005

The Dark Plague moves through aquatic creatures and hits Arkai.

Tensions rise as the White Army and the Red Army blame each other for the plague.

Year BNE 0003

The Dark Plague rips through the citizens of Arkai, decimating population, hitting halflings the worst.

The Second Great War begins between the White and Red Armies, destroying much of the already diminished population of Arkai.

Year BNE 0001

Halflings declared extinct all of Arkeera.

Major deities set up a meeting between themselves, the White Army, the Red Army, the dragons of Arkeera, and the Ombrian Empire.

A cure is created for the Dark Plague by Obad-Hai and distributed throughout the planet.

Peace treaties are signed and the White Army and the Red Army are merged into the Arkai Corporation.

Planar travel is officially banned by the Deities.

The Eroth Federation established between the Arkai Corporation, the Ombrian Empire, and the dragons of Arkeera.

This was the last known time a Deity appeared in the Material Plane in their true form.

Year NE 1-80

Beginning of the "New Era"

The Eroth Federation establishes distinct trade routes.

Merges the Ombrian Space Agency with the two smaller agencies from the Arkai Corporation into the Eroth Federation Space Agency (EFSA).

Ideas for missions to visit both Lunis and Nerv are created.

Year NE 81-150

Technological advancements flourish in the wake of the end of the Second Great War and the creation of the Eroth Federation.

First Steps on an extraterrestrial body by a humanoid from Arkeera on Nerv.

Both missions for a manned mission to Lunis and Nerv deemed successes, with no lives lost.

First Solar power harnessing devices begin to be created.

Year NE 151-300

First Privatized space agency established.

Preparations begin for more space exploration to the outer 4 moons as well as Tier.

Artificial Intelligence and Machine learning begin to be developed.

Arkeerans harness the energy of their two suns as well as wind and geothermal energy as their main sources of power.

Many new neighboring star systems discovered.

First civilian space visit.

First radio signals from outside of Arkeera are received.

Year NE 301-500

Beginning of the "Space Exploration Era"

Fission and Fusion engines finally created.

Space Exploration flourishes.

The EFSA establishes a Central Space Station outside of Arkeera (The EFCSS).

Lunar missions completed to Vithos and Syrra.

First androids created.

Successful exploration missions to both Genesis and Kor-karai. An ancient monolith is discovered on Kor-karai.

Deterioration of the terran landscape of Arkeera begins.

More lunar missions to Nerv and Vithos are executed, beginning the search for habitable landscapes.

Plans for a lunar base on Nerv are created.

The EFCSS grows at an increasing rate, now able to house a few hundred astronauts rather than half a dozen.

Nerv base is created first as a space exploration and scientific base, but soon gets additions for civilian visiting and living.

Androids, now as advanced as a machine as the humanoids of Arkeera, break free of their ownership and are integrated into civilian life.

Year NE 501-700

Civilian space visits and living become much more common.

The Nerv base explodes in size and popularity, housing more than 40% of the total population of Arkeerans.

The EFCSS also rapidly grows, holding between 15%-25% of the Arkeeran population.

Hyperspace engine developed by the TessX corporation.

In the following decades, successful trips to twin planets Zelios and Kaihl, gas giants Ratio and Maiar, and dwarf planets Cyprus and Hera are completed.

First contact with an alien civilization is discovered on the forest dwarf planet of Cyprus.

The highly intelligent race of rat-like humanoids dubbed "Ysoki" are peacefully greeted.

The terran landscape of Arkeera becomes near completely unlivable.

Emergency deployments of large scale "Cronos" starships are deployed with the remainder of Arkeerans that want to leave.

Several of the Cronos are invited to dock on Cyprus with the allied Ysoki people.

Few (2-4%) of Arkeerans stay on terran land.

Erothia people begin a process of making the neighboring planet of Kor-karai habitable.

The warp gate is developed.

Year NE 701-800

The Ysoki people, now completely integrated with the races of Arkeera, merge their space agency and governmental systems with that of the Eroth Federation entitled the "United Eroth Federation" (UEF)

The UEFSA begins its first exploration outside of the Eroth System.

First contact with the Kasathas, Vesk, Shirrens, and Lashuntas people over the next few decades.

Warp drives are set up between neighboring systems.

Technology of the newly discovered alien civilizations begin to be implemented into the UEF's technology.

Several more giant roving space stations as well as mega-starships are created by the UEF to hold the blooming population of Erothai.

The Erothai considered a Type 1 Civilization on the Kardashev scale.

The neighboring planet of Kor-karai project completes, and many Erothai people as well as a small percentage of other alien races migrate.

Much of the Arkeeran population on Nerv stays, but populations elsewhere bloom, leaving Nerv base with only 4-6% of the total Arkeeran population.

Year NE 801-814

Thousands of other alien civilizations discovered by the UEF due to the integration with other alien cultures and technologies.

The UEF invited to join the Galactic Federation of Star Systems (GFSS) inside the Orion Galaxy.

Exploration missions with newer, faster hyperspace engines are executed to begin discovery of the outside of the Orion Galaxy.

Year NE 815

Present Day
